

Press Release, ICE 2025 – Munich, March 11-13, 2025

Superior precision and flexibility across the converting industry: SAHM presents the new 460XE series at ICE 2025

SAHM, the world's leading manufacturer of precision winding machines, will present its latest innovation at ICE 2025 in Munich: the **SAHM 460XE Series**, a state-of-the-art precision parallel winding machine with a traversing spindle. This new series is specially designed to meet the demanding requirements that come with handling sensitive materials and tapes. Combining exceptional reliability, efficiency, and versatility, the **SAHM 460XE Series** sets a new industry standard in winding technology.

With its unmatched versatility, the **SAHM 460XE Series** can accommodate a wide variety of bobbin types – including cylindrical, cops, diabolo, pancake, step winding, delta stepwinding, flange tubes, and cross-winding configurations. This adaptability makes the 460XE Series ideal for diverse applications such as foamed tapes for sealing and insulation, towpreg and prepreg tapes used in composite manufacturing, and pitch-based carbon fiber designed for high-tech applications.

It is built for fast and efficient product changes and features a user-friendly interface that enables precise and intuitive operation. Their low-maintenance design ensures reliable and highly predictable machine availability.

Experience the Future of Winding Technology with SAHM at ICE 2025

Join SAHM at ICE 2025 in Munich, Germany, from March 11-13, 2025, at **Hall 6, Booth 670**, to experience firsthand the transformative capabilities of the SAHM 460XE Series. Discover how this revolutionary winding solution can deliver unparalleled precision and flexibility to your production processes.

For more information, visit sahmwinder.com or meet us at our booth during ICE 2025.

About SAHM

As a global technology leader for precision winding machinery, SAHM is designing, developing and constructing winding machinery for a wide variety of applications and industry sectors. SAHM specializes in helping manufacturers optimize upstream and downstream processing through its comprehensive winding expertise.

Georg Sahm GmbH & Co. KG has its headquarters in Eschwege, Germany, and offices in Greenville, S.C, USA and Guangzhou, China. It is a leading manufacturer of winders – not only for monofilaments, but also for tapes, carbon fibers, aramid fibers, high performance fibers, non-woven tapes, security tapes, etc.

SAHM belongs to the STARLINGER Group, Vienna, Austria.
